explanation

Run those functions:

```r
install.packages("devtools")
install.packages("shiny")
install.packages("shinysky")
install.packages("shinydashboard")
install.packages("bbmle")
install.packages("ggplot2")
```

Then you will need to load the devtools library:

```r
library(devtools)
```

Then run that:

```r
devtools::install_github("AnalytixWare/ShinySky")
```

After that you can run the App
